Land Condemned for a National Park Near Chattanooga, Tenn.

CHATTANOOGA, Tenn., June 10.-Several months ago the government condemned twelve acres of land north of Sherman heights, upon which was located what were known as Sherman's old earthworks, and sought to purchase the property from Squire Ford, its owner, for the purpose of making a national park of the land, and it was intended to spend \$250,000 on the work, but Squire Ford asked such an exorbitant price that a jury was named to assess the value.

The jury brought in an assessment of \$400 per acre. This suited neither the owner or the government, and the jury was discharged. Another jury was then appointed, who went through the same tactics of examining property and surprised everybody Saturday by bringing in a report assessing value of the property at \$825 per acre. An appeal will be taken to-day and Judge Key will try the case soon.

They unhitched the horses and themselves hauled the liberated leaders to the camp. Coxey and Browne spoke during the afternoon. He said he was going to make an address on the Fourth of July at Knoxville, Ky., for which he would be paid \$250. He also had other engage

ments to speak during the past month In speaking of his chances for election to congress, Mr. Coxey said he was not acquainted with the situation of affairs in the Massillon district, as he had not been at home for about thre months. Advices received from friends there, however, indicated that he would be successful.

The Effort to Have the Tariff Law Go Into

WASHINGTON, June 11.-The fourth draft of the pending tariff bill which was laid before the senate for consideration in April last, names the 30th of June as the time when the law shall go into effect. That day ends the fiscal car, and throughout all the prolonged debate which has since occupied the senate, Mr. Jones and Mr. Harris have contended that they would begin collecting duties under the new law with

the beginning of the new year. The present condition of things hardly supports their belief. There are several very important schedules yet to e considered, to say nothing of matters that have been left open pending final action when the bill comes out of the committee stage and goes into the senate.
